CastlePE's net asset value increased by 2.2 per cent during March. The positive monthly investment result was mainly driven by exits and valuation increases throughout the portfolio, namely the write-up in the valuation of Index Ventures III and Battery Ventures VIII, L.P.

The positive investment performance was reduced by the 3.2 per cent decrease in the value of the Euro versus the Dollar during the month resulting in an unrealised currency loss of USD 1.4 million.

March's cash flows were once again favourable: CastlePE received distributions of over USD 1.1 million, while overall investment outflows in the month were not significant. Uncalled capital ended the month at USD 45.9 million or 28.2 per cent of net asset value.

During March USD 0.3 million was used to purchase 27,984 shares via the company's share buyback program. This program, which started on 14 June 2019, was terminated on 18 March 2021. Overall, a total of 578,598 registered shares or 5.56% of the current share capital and voting rights were bought back.
